Provide your users with access to the data we've made in our network and data centers. 95% uptime SLA is backed by the investments we make for your data. We provide end-to-end security from device based encryption, across the network and within our carrier grade data centers.

Back to Top 

AsigraSM agentless client technology enables:

- AES 256-bit encryption key
- FIPS 140-2 security certification
- Compliance requirements for SOX, HIPAA, Basel II, etc.
- Backup of all files and across all OSs: Windows, Linux & Mac OS
- Incremental client-side deduplication to reduce network bandwidth usage
- Compression technology drives efficient network utilization
- Simplified install and operations minimizes downtime, disruption and end user maintenance

SSL connection with X.509 certificate utilizes CenturyLink network with:

- Data sent over private facilities
- Direct connection to data center
- Fully owned and managed by single provider
- Core MPLS network with 99.999% availability
- Range of connectivity options, including secure VPNs

Your data is protected in highly secure data centers:

- SSAE 16/SAE 3402 Type II compliant
- Built to Tier 3 standards
- Fully redundant systems
- Staffed 24X7 with security and technical personnel
- Data stored in geographically diverse centers
- Dual authentication required for entry
- Protected with latest cyber security
- 100% center uptime availability

Save time and money on the road.

Sure we deliver a great price, but what's more important is the bigger financial picture. Total Cost of Ownership is all about financial benefits down the road. You'll never have to deal with upfront hardware costs, maintenance, and ongoing expenses. By eliminating capital investments, you get a per-user cost that's easy to budget.

Our flexible model allows you to scale your storage so you only pay for just what you need.
